LED MES LAMPS

LED MES LAMPS a range of high brightness LED lamps in various colours that come with an MES base. These solid state lamps have a lifespan of up to eight times that of conventional filament lamps, as well as being more robust, making them an extremely cost effective alternative. These lamps can be used in a wide range of applications as a direct replacement for filament lamps and are suitable for both illumination and indication for torches, indicator panels, automotive and backlighting. With a water clear lens, AC/DC operation, 240mW power consumption, long lifespan, low power consumption and shockproof. Available in a choice of colours and a 30° or 100° Viewing angle. Note: LED lamps are polarity sensitive, please ensure correct wiring polarity is observed.

SCREW BASED LEDS

SIXCESS LED LAMP 12V WHITE E12 this E12 based lamp contains eight state of the art LEDs and packaging technology to produce a device that has the appearance of an incandescent bulb with the performance and economy of a solid state device. Intended as a replacement for the traditional six Watt 6S6 candelabra bulb whilst only using twenty per cent of the energy and lasting twenty times longer. It has a rugged solid state construction for shock and vibration resistance and low power consumption means reduced running costs. Excellent reliability means reduced down time and maintenance costs.

- * 12V input
- * Warm white colour similar to a traditional 6S6 lamp
- * Sealed socket for use indoors or outdoors
- * A compatible lamp holder is also available - see below

Note: LED lamps are polarity sensitive, please ensure correct wiring polarity is observed.

Technical Specification

Input voltage:	12V
Power consumption:	<1W
Colour temperature:	3100 Kelvin (average)
Lumen output:	8 lux (over 1m)
Lumen degradation:	15,000 hours with 70% lumen maintenance
Size and socket:	6S6 Candelabra form factor
Lens:	Polycarbonate with UV inhibitors
Operational temperature range:	-10°C to +43°C

ALARM MIMIC INDICATOR

FLASHING LED ALARM MIMIC a flashing LED in a mounting bezel designed for fitting in the dashboard to indicate an alarm is armed, even if none is installed. Fitted with a 1.5m lead. 12Vdc, 10mA.

CODE	TYPE	PRICE
800-001	Flashing LED Alarm Mimic.....	£2.79

LED BADGES

FLASHING BADGE MODULE a 25mm diameter module incorporating a 3mm flashing red LED, ideal for making novelty badges, etc. The module is powered by two L736 button cells (supplied) and is fitted with a safety pin type catch. The badge is activated by squeezing, which operates the internal on/off switch. Replacement cells are available.

CODE	TYPE	PRICE
622-473	Flashing Badge Module Round 25mm.....	£2.99

FLASHING LED BROOCH a triangular module incorporating a 3mm flashing red LED, ideal for making into novelty brooches, etc. The module is powered by two L736 button cells (supplied) and is fitted with a safety pin type catch. The brooch is activated by squeezing the top, which operates the internal on/off switch. Replacement cells are available. Dimensions of case excluding LED and catch 30 x 22 x 7.5mm.

CODE	TYPE	PRICE
622-477	Flashing LED Brooch Triangular.....	£2.99

FLASHING LED MODULES

FLASHING LED MODULE a flashing LED module powered by two AA cells (not included) for long operational life (up to 3 months). Applications include dummy car alarm warning light, light switch locator for dark corridors, warning signs, novelty products and modelling projects. The enclosed battery box with built in slide on/off switch provides a convenient power supply solution. The high brightness red 5mm LED is partly recessed into a circular foam pad which is self adhesive on the top surface for easy mounting behind a panel hole, with the LED projecting through the hole. Battery box dimensions 69 x 34 x 19mm. Lead length approx 180mm. LED PCB approx. 8mm square.

CODE	TYPE	PRICE
622-479	Flashing LED Module.....	£2.75

10 FLASHING LED MODULE a flashing LED module, with built in timer, producing a multi-coloured running light effect similar to that seen in disco light shows. Ideal for eye-catching displays, notices, etc. The module consists of an assortment of ten red, green and yellow 5mm LEDs which flash in pairs in sequence. By arranging the LEDs around the PCB, a large display can be created with minimal effort. The module is activated by a push button switch mounted on the PCB, and runs for approximately 10 to 15 seconds before automatically switching off. The module is powered by two, replaceable L1131 button cells. PCB dimensions 47x29mm, LED lead length approx 280mm.

CODE	TYPE	PRICE
622-475	10 Flashing LED Module.....	£6.25

SQUIRES MODEL & CRAFT TOOLS

6 LED LIGHT STRING an LED light string producing a light effect as seen in disco light shows etc. Also ideal for eye-catching displays, notices etc. The string consists of six 5mm red LEDs which flash at random. The module is activated by an on/off push button switch mounted on the PCB, and is powered by a single, replaceable long life CR 2032 lithium coin cell. Replacement cells are available. Main PCB 37 x 26mm. LED PCB 14mm square. String length approx 300mm.

622-481	6 LED Light String.....	£6.25

SOLAR PANELS

SOLAR MODULES a range of encapsulated solar cell modules mounted in a black polycarbonate case. The faceplate consists of small bubble magnifiers which maximises performance by enhancing the light as it strikes the cell. All the modules have an output of 0.45V and are fitted with threaded stud terminals. The modules can be connected in series to produce the required voltage. Output current ranges from 100mA to 800mA.

3V SOLAR PANEL a fully encapsulated assembly comprising eight individual cells and producing an output of 3V, 100mA maximum. Can be used as a power source for low current equipment or for trickle charging AAA or AA size rechargeable batteries. Fitted with a hinged mounting bracket, output is via a 1.8m cable, terminated with red and black crocodile clips and a 1.3mm walkman type DC power plug. Dimensions: 95 x 65 x 7.5mm

CODE	TYPE	PRICE
18-0240	Solar Panel/Trickle Charger 3V.....	£9.49

SOLAR ENERGY KIT

SOLAR ENERGY KIT a complete kit which is intended for students as an introductory kit to solar energy. The kit comprises 8 500mV 100mA solar cells, a battery holder, a miniature DC motor, a small fan plus all the tools and cables enabling the user to construct a working kit. The solar cells provide an output of 3.2V and can be used to drive other small components. Supplied with a 12 page booklet which explains solar energy.
