## ANALOGUE MULTIMETER

**ANALOGUE MULTIMETER** a pocket analogue multimeter, offering basic specification at low cost. The meter offers a total of 16 ranges including a battery test facility for 1.5V and 9V cells. Supplied complete with 4mm test leads, battery (1 x AA size) and full instructions.

### Specification

AC voltage.....10-50-250-500V  
 DC voltage.....2.5-10-50-250-500V  
 DC current.....0.5-10-250mA  
 Resistance.....Ohm x 10 (Scale centre @ 50 ohm).  
 Ohms x 1k (Scale centre @ 5k Ohms)  
 Battery test 1.5V / 9V  
 Sensitivity 2000 ohm/V DC & AC  
 Battery 1.5V (1 x AA)  
 Dimensions 115 x 68 x 32mm

**328 DIGITAL LCD MULTIMETER** a high accuracy 3½ digit multimeter designed in accordance with IEC-1010. The 32 ranges cover the basic AC and DC voltage and current ranges as well as ranges for the measurement of capacity, temperature and frequency. In addition, there are positions for diode and transistor tests and audible continuity. The large clear LCD display incorporates a low battery indicator which shows when the battery is exhausted (replacement type PP3). If no activity is detected for approximately forty minutes, the meter will automatically switch off to preserve the battery, guarding against the meter being accidentally left switched on. The 328 is supplied with a rubberised holster which protects the meter and allows it to be angled by means of a two height stand built into the base. The holster also allows wall mounting and provides storage for the test probes. In addition to the holster, the 328 is supplied complete with test leads, battery and instruction manual. Overall size 31.5x 91x 189mm.

**955 AUTORANGING LCD MULTIMETER** a fully autoranging 3 3/4 digit multimeter with a dual LCD display which has a maximum reading of 3260 and a 32 segment bargraph. The autoranging facility enables a wide range of measurement levels to be read without the need to constantly change the range switch. If required the autoranging facility can be overridden and ranges selected manually. A data-hold facility enables readings to be captured and held. In addition to the normal basic functions, the 955 also features ranges for capacitance, frequency, diode and transistor testing. The 955 is supplied with a rubberised holster which protects the meter and allows it to be angled by means of two height stand built into the base. In addition to the holster, the 955 is supplied complete with test leads, battery (PP3) and instruction manual. Dims 91 x 189 x 31.5mm.

**INDUCTANCE CIRCUIT TESTER** a dual function screwdriver type circuit tester. Used as an inductance tester it will detect buried live cables and breaks in cables etc. When touching a live part with the tip, the voltage level will be indicated on the LCD display. Maximum 250V AC or DC. Length 125mm.

CODE	TYPE	PRICE
ICT23BA	Inductance Circuit Tester.....	£1.99

**NON CONTACT AC VOLTAGE SENSOR** a useful tool for detecting live circuits, location of breaks in cabling, fault finding and low voltage. The sensitivity is adjustable with a voltage test range of range 5 - 1000V. Voltage is indicated by Audio/visual signal. Powered by 4 x LR44 batteries (supplied). Full instructional leaflet included.

CODE	TYPE	PRICE
71389	Non Contact Voltage Sensor.....	£11.49

**BATTERY, BULB, FUSE & CONTINUITY TESTER** Multi-purpose tester for dry cell 1.5V batteries (AAA, AA, C, D and button-type), 9V batteries (PP3 /6LR61), household and automotive fuses, bulbs (with bayonet fitting plus push/screw type torch light bulbs). Readings show up on clear scale.

There is also an audible continuity tester via test probes supplied. Runs off 1 x 9V PP3/6LR61 battery (not supplied).

## LED TESTER

**LED TESTER** this easy to use tester allows simple testing (functionality and polarity) and matching of low current LED's. The test sockets are designed to accept both new and used components which may have a small amount of solder remaining on the leads. LED's may be tested at 1,2,5,10,20 and 50mA forward current by simply inserting the device into the relevant pair of sockets. Two pairs of sockets are provided for the 10mA current level, allowing two LED's to be compared for colour and brightness under identical test conditions. The tester uses a single 9V, PP3 battery (not included). Dims: 74 x 74 x 23mm.

CODE	TYPE	PRICE
622-575	LED Tester.....	£12.99

## TIMERS

**COUNTDOWN TIMER** an electronic countdown timer with 19 hours, 59 minutes countdown capability. The internal alarm will sound when the set period has timed out. Many applications in the workshop, laboratory, garage and home. It may be used free standing or it has a magnet and a spring clip for mounting.

CODE	TYPE	PRICE
TET010	Countdown Timer 19hr 59min.....	£5.99

## METRONOME

**MECHANICAL METRONOME** a traditional mechanical metronome in a plastic housing. Features a high quality metal mechanism, traditional beat demonstration 40-208 BPM.

**Specification**  
Dims 118 x 206 x 104mm  
Tolerance <1%  
Weight 470g
