## MOLEX MICRO-FIT 3.0 POWER CONNECTORS

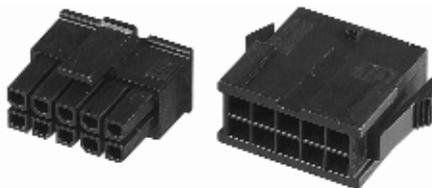

An interconnect system based on a 3.0mm grid spacing which is capable of carrying 5 amp. This high density dual row wire to wire (free or via panel mounting) system is ideally suited to many signal and power applications. Positive latch prevents accidental disconnection, full polarisation, fully isolated contacts. The terminals are crimped to the wire, requires pin and socket contacts listed below.

### Technical specification

Voltage rating:- 250V ac (rms) or DC. Current rating:- 5A per contact  
 Contact resistance:- 10m ohm max. Insulation resistance:-1000M ohm max  
 Dielectric strength:- 1500V ac.  
 Contact material:- Tin plated phosphor bronze  
 Housing material:- Polyester. Header material:- High Temp LCP.

### MICRO-FIT 3.0 RECEPTACLES & PANEL MOUNT PLUGS

housings for wire to wire connections. The plugs are fitted with ears allowing panel mounting. Receptacle Molex type 43025-xx.00. Plug Molex type 43020-xx00 where xx is no of ways.

## MAINS POWER CONNECTORS

**MINIATURE 3 POLE MAINS CONNECTORS** miniature industry standard 3 pole non-reversible mains connectors moulded in glass-filled nylon, with contacts rated at 2.5A 250V AC. The range comprises a panel mounting plug, and free sockets available in right angle or straight formats with or without strain relief. The free socket without strain relief is rated at 50V because of its construction, however this rating can be safely increased to 250V AC provided the connector is totally enclosed e.g. for internal connections, and is accessible only by use of a tool ie cannot be reached accidentally. An insulating boot is available for the chassis mounting plug.

### Technical Specification

Contact rating	3A 250V
Contact resistance	<10mΩ
